This action is in response to the application filed 1/20/04.

Reasons for Allowance

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 14 contain the limitation for forming a shallow trench isolation where the surface of the hard mask used to form the trench is oxidized by a wet chemical oxidation, and etching back the oxide to form an enlarged opening and rounding the trench corner. This limitation, in combination with the other limitations of claims 1 and 14 is not taught or suggested by the prior art of record. Ibok (US006180466B1) forms an oxide on the hard mask by deposition and etches the oxide, but not to form a larger opening, but to provide a spacer for an under-etch to round out the corner. Nguyen (US005843846A) and Yen (US006261921B1) etch back the hard mask itself to round out the corner, but do not oxidize a surface of the hard mask. Yu (US5801083A) and Gardner (US005891787A) form (non-oxide) spacers to round out the corners.

Claims 2-13 are allowed as being properly dependent upon allowed claim 1.

Claims 15-22 are allowed as being properly dependent upon allowed claim 14.
